Discussion

The ER RSOP Notification includes full suite sampling for the confirmation samples for the remedial action at this location. However, the action is driven by the radiological contaminants only. Therefore, as agreed, confirmation samples collected for the remedial action at IHSS Group 900-12 will be analyzed for radiological constituents only. As stated in the notification, the additional characterization samples collected at Trench 9a will be analyzed for radionuclides, metals, VOCs, SVOCs, and PCBs. Backfill will be based on field screening results with confirmation samples results to follow.
